

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) An E-electrical apparatus for the processing of video and/or audio data, said apparatus comprising:

a printed circuit board within an apparatus housing and carrying processing components thereon and the printed circuit board is provided with at least one scart connection for the connection of further apparatus externally thereto and for the transfer of data between said further apparatus, and wherein there is provided for selective attachment to the scart connection, an adaptor, ~~said adaptor~~ provided with at least one scart connector for connection with ~~the~~ said apparatus, and at least one output connection for the selective connection thereto of phono and/or other format connectors, from ~~the said further apparatus, wherein said adaptor is attached to said printed circuit board and located~~ within the housing of said apparatus with the at least one output connection exposed externally of the housing of said apparatus to allow attachment of a phone and/or other format connectors thereto.

2. (Previously Amended) Apparatus according to claim 1 wherein a common printed circuit board configuration is used for said apparatus.

3. (Previously Amended) Apparatus according to claim 1 wherein said apparatus is a broadcast data receiver.

4. (Previously Amended) Apparatus according to claim 1 wherein said printed circuit board

and said adaptor include two or more scart connectors for mutual engagement.

5. (Previously Amended) Apparatus according to claim 1 wherein when said adaptor is not attached to said printed circuit board the at least one scart connector of said printed circuit board is exposed externally of said apparatus to allow the attachment of scart connectors thereto by the user.

6. (Canceled)

7. (Currently Amended) Apparatus according to claim 6 1 wherein when attached to said printed circuit board, said adaptor connectors are mounted in a plane perpendicular to said printed circuit board.

8. (Currently Amended) Apparatus according to claim 6 1 wherein said adaptor is positioned at ~~the~~ a rear of said apparatus.

9. (Canceled)

10. (Previously Amended) Apparatus according to claim 1 wherein said connector includes connector outputs of more than one format.

11. (Currently Amended) An ~~E~~lectrical apparatus for the processing of video and/or audio data, said apparatus comprising:

a printed circuit board carrying processing components thereon, ~~and~~ the printed circuit board

~~is provided~~ within a housing which has at least one connector of a first format connected to the printed circuit board and to allow the connection of further apparatus thereto and for the transfer of data between said apparatus, and wherein there is provided for selective attachment to the connector, an adaptor, said adaptor provided with at least one connector of the first format for connection with the said printed circuit board and at least one further connector of a second format which differs to the first format connector and said adaptor located within the housing with the at least one further connector of a second format exposed externally of the housing.

12. (Previously Amended) Electrical apparatus according to claim 11 wherein when said adaptor is not connected, the first format connector is exposed externally of said housing for connection with further apparatus.

13. (Canceled)

14. (Previously Amended) An adaptor for use with electrical apparatus, said apparatus comprising:

at least one connector of a first format connected to the printed circuit board and to allow the connection of further apparatus thereto and for the transfer of data between said apparatus, and wherein the adaptor is provided with at least one connector of the first format for connection with the said electrical apparatus and at least one further connector of a second format which differs to the first format connector.
